

Program Schdeule

Our program is divided into
2 periods

Period 1

Oct 6th -> Jan 5th
Event: Early January

Period 2

Jan 12th -> Mar 9th
Event: Early March

Weekly Meetings

We meet every **Thursday**
from 4:00 PM - 6:00 PM

Kids will work on developing
and tuning their robots for
showcase

Pricing

For each 3 month period, the fee is
\$200 per person. This covers parts,
registration and event fees

About Us

We are 22817 KNOTbot, a 12 member
team based out of Killarney Secondary.
We compete in the FIRST Tech
Challenge (FTC), which is the level
above FIRST Lego League (FLL). Our
team has done many workshops at
local elementary schools teaching kids
about coding and engineering, which
have totaled to over 30 hours
combined.

Our Awards

- 1st Place Innovate
- 1st Place Think
- 2nd Place Control
- 3rd Place Innovate

3rd & 6th Place
Provincially

LEGO Robotics Program

Weekly robotics program where
kids join a competitive team, build
robots, learn STEM skills, and work
with experienced mentors

DISCOVER

CREATE

INSPIRE

At Sunset
Community Centre

FIRST Lego League (FLL) is a youth robotics program which provokes curiosity in children.

Through hands-on experiences, it inspires discovery, innovation, and teamwork. It is a fun way to enter the world of STEM.

Learn more about FLL here

Why Choose Robotics?

Creativity

- ↳ Create ideas and experiment with them

Teamwork

- ↳ Collaborate with a team of like-minded students

Problem-solving

- ↳ Overcome challenges and think critically

Real-world impact

- ↳ Develop skills to be a part of the future

The team will participate in festivals where they will showcase their work to judges and visitors. As a friendly environment, children learn the importance of working together and sharing ideas.

Daily Breakdown

Each meeting is designed to be fun, structured, and hands on.

Introduce new concept

We start with a short lesson or demo to learn something new

Brainstorm solutions

Teams discuss ideas and plan how to solve challenges

Experiment with ideas

Build, code, and test robots

Refine and improve

Make improvements and prepare for next steps

Wrap up and reflection

Share progress, set goals, and celebrate achievements

Season Timeline

Period 1

- Learn robotics fundamentals
- Build your first robot
- Explore this year's theme
- Design the structure
- Overcome challenges

Jan:
Regional

Period 2

- Complete mission challenges
- Develop & test solutions
- Refine design
- Practice as a team
- Showcase to teams across the province

March:
Provincials
